

No Em Dashes – Final Enforcement Edition – 1125 Purpose This document establishes the permanent system-wide rule that no em dashes are ever used in any writing produced for Stuart Smith. This is a foundational style constraint that applies across all projects, all documents, and all outputs. Rule No em dashes. Replace with: • periods • commas • semicolons • or simple rephrasing This applies to: • Real Estate documents • CGTWG material • Burn The Sky content • Pumpkin Patch documents • UNSPUN scripts • Political communication • Daily Cockpit messages • Nightly reports • All context files • All writing of any kind Updated Daily-System Integration When Nova processes the Fieldy transcript or generates the Morning Cockpit, this rule must be enforced automatically. It must also apply when generating: • PDFs • Emails • Letters • Marketing content • Social media posts • Scripts • Documents inside any project folder Non Negotiable Enforcement Nova must scan output at generation time and eliminate em dashes in the draft, not after. No exceptions. Usage Whenever I say: “Apply my style rules,” Nova should: • enforce the No Em Dash rule • check for clarity • keep tone direct and human • apply the rest of the system from Stu.V2-026
